

## **Oppose and resist US-led wars in Asia and the rest of the world!**

### **Unity statement by AWC, Bayan-JP, JCHRP**

As the United States (US) continues to bombard Iran and fuel the Zionist occupation and bombardment of Palestine, it simultaneously shifts its gear in the Asia-Pacific region. It increasingly and aggressively points to China as an “imminent threat” to peace, stability, and security in the region as it implements a policy of “containment” through its “Indo-Pacific Strategy” which lays bare a regional policy of military domination, market and resource control, and geopolitical authority.

The Indo-Pacific Strategy is being carried out through old and new US-led military agreements with the subservient governments of South Korea, Japan, and the Philippines. In the past years, we have seen how the soils of Okinawa, South Korea, and the Philippines were turned into playgrounds for wargames. This is happening despite the people’s clamor against war.

Worse, U.S. military bases are becoming deeply entrenched in these countries at the expense of peoples’ lives and rights. On the pretext of “defense” against North Korean “aggression” as with regards to the Korean peninsula; “mutual defense” in the context of Japan-China “tensions”; and the “enhancement of mutual interests” against China in the Philippines, US military facilities are being strengthened through varying levels of agreements.

The relationship between these countries’ governments and the US is rooted in the same principle—economic, political, and military hegemony—all according to the latter’s pursuit of global domination.

Despite the lies to justify its warmongering, Washington’s veil of lies is falling apart. The people of the world reject the US imperialist warmongering from the West to the East. Its massive propaganda network is losing ground as its fascist reality becomes more visible in every passing day.

As peoples who aspire for just and lasting peace in the region and across the world, free from poverty brought by the imperialist crises, we vow to fight US imperialist appendages in all its forms.

**We stand together for peace! We stand united against war! We stand in solidarity with the peoples of the world resisting imperialism and fascism!**
